Hi Guys,

There's something I can not explain to myself, so maybe someone can enlighten me?

```
print,fix(4.70*100)
```

```
469
```

and also:

```
print,string(4.70*100,format='(i3)')
```

```
469
```

While, everything else that came into my head to try was OK like:

```
print,fix(5.70*100)
```

```
570
```

```
print,fix(3.70*100)
```

```
370
```

```
print,fix(4.60*100)
```

```
460
```

```
print,string(4.60*100,format='(i3)')
```

```
460
```

```
...
```

```
etc..
```

Thanks in advance!

Cheers.

Boryana
