In the following code j is defined as a 'long' number...

But the number j*100 as a subscript of x in plots command is not a 'long' number...

causing a problem when the limit is reached..

How do i fix it??

How do i define all numbers long?

```
n=100000L
x=findgen(n)
y=findgen(n)
z=findgen(n)
XInterAnimate, set=[500,500,999]
  for j=1L,998L do begin
    plots, x((j-1)*100:j*100), y((j-1)*100:j*100),
    z((j-1)*100:j*100),/T3D,/DATA
    XInterAnimate, Frame=j
  endfor
XInterAnimate
```

Thanx a lot
