Subject: IDL-WAVELETS-JPEG200 Posted by Kostas on Mon, 30 Apr 2007 22:47:30 GMT View Forum Message <> Reply to Message

Dear IDL Users.

I want to apply Daubechies 9/7 filter (high pass -low pass wavelet coefficients) in order to simulate the jpeg200 wavelet transform.

The wavelet functions provided by IDL do not have this ability.

Do i have to write the whole program for this transform, OR there is another way of doing it using some predifined functions,?? OR meyby you know some one who has write this program OR.....

Thank you in advance for your help.

Kostas
