hi everyone, i have some problem with idl dababase

i am working on some meteorological data which store in a mssql server.

so i use idldatabase connect the database, then use idldbrecordset to get desired table.

but something happen. because in my original table ,some record name is in chinese. when i process this data , it say something like that

"

\$MAIN\$

"

it seem like that the record name must be english. can anyone help my explain this? or find a way to solve this problem?
