> window, xsize=200, ysize =150

newimage = dblarr(xsize,ysize)

newimage[(xsize-imageSize[0])/2:(xsize-imageSize[0])/2+image

Size[0],(ysize-imageSize[1])/2:(ysize-imageSize[1])/2+imageS ize[1]]

= image

tv, newimage

> end

Create a new image that is the size of your window. Place the old image within the centre of the newly created image and then display it. I hope I didn't do any mistake within the implementation above; you might need to adjust the indices slightly, I haven't tested it.

HTH & Regards,
Ingo
