Thank you for your help, Ben and Vince!

It is impractical if there's no easy way to read in the "Value" tags.  
But I discovered that also the HELP-function shows me all the  
information I need.

Is it possible to copy the HELP-function generated text on the  
logscreen into a text array?

This text array is necessary for me because I want to build a widget  
which shows exactly this information.

Greetings,  
Michael
