Hi, Natasha!

I had to compile my own library under SunOS 4.1.2 for IDL 3.x.
They have sources in directory (in my configuration, of course) :
/u/rsi/idl_4/external/rpc.

So look in \$YOUR_IDL_DIR/external/rpc.

I've tried rpc some time ago and found that (for version 3.x) even
some examples doesn't work.

Good luck,
Anton
