```

More like:

```
if (widget eq 'button_save') then begin
  widget_control, pic, set_uvalue=image
endif
```

```
if (widget eq 'button_show') then begin
  widget_control, pic, get_uvalue=image
  tvscl, image, true=1
endif
```

But I wouldn't put "image" directly in the uvalue, I would put it my state structure or whatever equivalent you are using.

Mike
