hello,

I want to plot a line on an image (128x128) between two points, say (2,1) and (1,4). When I use PLOTS it fills all the pixels between the two points, i.e. the line is represented by the pixels (2,1),(1,2), (1,3),(1,4). Is there a way to plot a line on an image as an overlay without filling the pixels, i.e. similar to plotting a line on a graph?

Thanks.

ashraf.
