Subject: Nice File widgets?

Posted by mbrown on Thu, 14 Dec 1995 08:00:00 GMT

Hello. I was wondering if anyone has code for a nice FILE widget.
Something like the Load and Save widgets we see when we load or save
something in IDL. I'm surprised that it's not included with IDL
directly for use. Maybe it is, and I'm just not looking hard enough.
Any suggestions and or code (or location of code via FTP, etc.) would
be appreciated greatly.

Myron.
