I cant manage to display an array with tvscl using a color table taken by XLoadCT

The table is loaded normally but i dont see any colors

What's wrong with my routine?

Any suggestions on this??

LoadCT, 33

for i=1,100 do begin

 image=congrid(bytvsc(ARRAY[*,*,i]),500,500)

 tvscl,ROTATE(image,1)

endfor

Thanx
