Subject: delete keys in IDL Posted by alvin[1] on Tue, 17 Jul 2007 07:36:52 GMT View Forum Message <> Reply to Message

Hi group,

Whenever I start IDL from the xterm, only the 'backspace' key works normally. The 'delete', 'home', and 'end' keys don't. I know that IDL sets up its own keys to do for example "delete" :Ctlr-X deletes the current character. But I want to have the 'delete' key do delete, and the others as well. Thank you. Alvin.
