Hi

I have tried to use the IDLnetURL in the IDL6.4 to retrieve the text contant.But failed.which can tell me how to retrieve the contant ,such as 'http://groups.google.com/group/comp.lang.idl-pvwave/post?_done=%2Fgroup%2Fcomp.lang.idl-pvwave%2Ftopics' or 'http://www.google.cn/intl/zh-CN/about.html' and so on

thank for your answer!
