Similar. I now use the following:
FUNCTION WPLOT Which Button, Value
 CASE Value OF
   1: e='LEFT'
   2: e='MIDDLE'
   4: e='RIGHT'
   8: e='UP'
  16: e='DOWN'
  ELSE: e='NONE'
 ENDCASE
 RETURN. e
END
and call it thusly:
IF ( WPLOT_Which_Button(event.RELEASE) EQ 'LEFT' ) THEN BEGIN
I decided to use the CASE statement since one can't rely on the 8 and 16 values remaining
 valid (and apparently, in v6.4, they're not)
cheers.
