Subject: about bridges and external programming
Posted by kanderben on Sun, 12 Aug 2007 06:19:48 GMT

Can somebody explain little more about in what a difference between
IDL bridges and IDL external programming ?
When to use bridges ? When to use external programming ?

does bridges only exporting and importing data between IDL and
external application ? only data ?
I was look at help pdf files. it's not clear at all :(
