Subject: error message:unable to allocate memory Posted by incognito.me on Tue, 21 Aug 2007 13:37:14 GMT View Forum Message <> Reply to Message

Hi everyone,

I'm trying to solve a linear equation system of the type Ax=b with IDL by using the procedure LA_SVD or SVDC.When A ist a small array the result ist always zero.What doesn't really make sense.When I attend to use big arrays (512x512) for A,I get the following error message: Unable to allocate memory:to make aray.

I tried to use the TEMPORARY function, but it did't help. Can someone gives me an advice.

Thank you
