Hi

I have some trouble with iplot.

```
> idl  
IDL> iplot,dindgen(1000000)
```

How do I need to configure idl to get that plot faster shown.

After start of idl it needs more as 5 mins on my box.

time_test3 tells
0.863153=Total Time, 0.032215425=Geometric mean, 23 tests.

cheers
Reimar
