You should try to obtain the book "Learning IDL" which is put out by Research Systems, Inc. This book is used in their training courses and is a great way to learn how to use IDL interactively and even some programming. I think that you can purchase it from them by contacting them at:

Research Systems, Inc.
2995 Wilderness Place
Boulder, CO, USA 80301
Tel: (303) 786-9900
Fax: (303) 786 9909

I hope this helps.
