Hi map_setters,

When I use the /fill option in map_continents in the example below, the filling doesn't stop at latitude = 20N (look at Africa).

Is there some way to get this to work properly, or is this another example of a "feature" that really doesn't work very well?

Please tell me I don't have to re-learn NCAR graphics!

```
IDL> map_set, 90, -90, /cont, /stereo, /iso, /grid, limit=[20,0,90,360]
```

```
IDL> map_continents, /fill
```
