I didnot clearly state the problem, first time I guess.

This is what I want to do

(i) Create 2 column plots !p.multi=[0,2,1]

(ii) Plot (column 1)

(iii) Plot (column 2)

Now I want to

(iv) Oplot (column 1)

(v) Oplot (column 2)

I tried

saving and restoring !x,!y,!z and !p. It does not work for

me yet.

Still looking for the solution... (if it exists)

sanjay
