---

Hello Folks,

I'm stranded with server downtime (thankfully with net access!) and looking to prepare a start on some IDL; can someone tell me please if it's possible to include from a FOR loop the variable we are looping over in the filename of some kind of file?

eg;

```
FOR i=0,1 DO BEGIN  
device, filename='i.jpg'  
plot_image, A  
ENDFOR
```

so that I can produce filenames 0,1,2..etc.

Thanks,

David.
