I'm guessing that you have specified an impossible image representation based on the pixel data you are setting. Try using SetPixelData without so many keywords.

```
olmg -> SetPixelData, reform(image[*,*],imsize[1],imsize[2]),  
PHOTOMETRIC_INTERPRETATION = 'MONOCHROME2',  
SAMPLES_PER_PIXEL = 1, PIXEL_REPRESENTATION = 0, COLUMNS =  
imsize[1],  
ROWS = imsize[2]
```
