Bob, thanks I think I do mean range not zrange but it doesn't change the error.

```
IDL> colorbar, range=[0.,70.7107], /ylog, /vertical, $
ytickv=LogLevels([0.,70.7107])
% PLOT: Warning: Infinite plot range.
% AXIS: Data coordinate system not established.
% Error occurred at: COLORBAR      412 /Users/balarsen/Documents/
idl/larsen/fanning/colorbar.pro
%           $MAIN$
% Execution halted at: $MAIN$
```

Cheers,

Brian
