Subject: allocating memory

So, I have this large model file that I need to open. Although it is
650MB I should be able to open it in IDL on my pc computer which has
~4GB of Memory. However, it keeps telling me insufficient memory.
However, if I try to open it in IDL on a linux machine with ~2GB
memory I can open it no problem. Is there a way to make my windows
based pc cooperate and allow me to open this file that should be no
problem to open?

Thanks,
Hawaiianite
