[View Forum Message](#) <> [Reply to Message](#)

A patch for IDL 6.4 that enables it to run on the recent release of Mac OS X 10.5 (Leopard) is now available. For more information or to download the patch, please visit <http://www.ittvis.com/services/techtip.asp?db=INT&ttid=4> 284.

Also, the upcoming IDL 7.0 release scheduled for later in Nov will support Mac OS X 10.5.

Thank you,

Bill Okubo
