Subject: Superimposing Images with iimage
Posted by weclifton on Wed, 31 Oct 2007 16:40:16 GMT

This seemed to be a simple task (and in reality probably is), but I
've been thrashing about long enough. I hope someone can help out. I
am trying to import two images into iimage, make one transparent then
independently scale and translate the images until they overlap one
another.

Thanks,
Bill
