Subject: IDL and IDL-PVWAVE disambiguation
Posted by Robbie on Wed, 31 Oct 2007 02:16:51 GMT

Hi

I've noticed that a few open source IDL projects are finding
themselves on sourceforge. However, the IDL category seems to have a
mixture of both "Interface Definition Language" and "Interactive Data
Language". Would it make more sense to have an IDL-PVWAVE category, or
perhaps an IDL-ENVI category?
