OK, if you search c.l.i-p for this you'll find a post from Craig Markwardt wherein he laments that JULDAY "doesn't handle fractional days". Someone replies to say yes it does, but I think that person misunderstood.

```
IDL> print,julday(12,31,2005,0,0,0)
      2453735.5
```

```
IDL> print,julday(12,31.2,2005,0,0,0)
      2453735.5
```

I'm really unhappy with IDL right now.
