Subject: Looking for IDL neural net routines
Posted by fleming on Wed, 31 Jan 1996 08:00:00 GMT

Hi,
  I'm looking for artifical neural network routines written in
IDL. I am specifically looking for routines to do a supervised
training and a classifer for 2 or 3-D datasets. I have looked
at the Habbersett routines, but they are an unsupervised trainer
and classifier for 1-D data. Has anyone already written
something similar, or know where I could find one? Thought I'd
better check before re-inventing the wheel.
