Make yourself happy, and let IDL figure out which unit numbers to use.
you cannot combine /get_lun with a hard-coded number.

```
openr, land_lut_unit, land_lut, /get_lun  
openw, out_unit, "land_scat_clas_tuned.dat", /GET_LUN
```

```
close the units again with  
free_lun, land_lut_unit, out_unit
```

HTH,

Maarten
