Hi everybody

I am new in IDL , I want to plot data which restored in txt file and plot by below code.

```
pro test
A_x=fltarr(1)
A_y=fltarr(1)
fn='F:\test.txt'
openr,1,fn
repeat begin
readf,1,x,y
;A_x(*)=x
;A_y(*)=y
plot,A_x,A_y
endrep until eof(1)
close,1
;plot ,A_x,A_y,PSYM=4,Title="test"
END
```

It runs ,but plot only a frame!! Can anybody say me where the error is ?

Best,Nakisa
