Hi All,

I was wondering if anyone knows if its possible to use a 3d iPlot on a map projection - either iMap or ilimage, like on the bottom of <http://www.dfanning.com/tips/scatter3d.html>

Although you can add a 'map projection' to the iPlot it doesn't seem to actually relate to any coordinates in the iPlot dataset itself? Any help would be greatly appreciated.

RPF
