David,
I think you are being a little harsh here. Would you rather have spent the
500 bucks on yet another image processing tool, filter, etc. that you will
never use? This DE thing was way over due, especially on Linux/Mac, where
the old DE was completely unworkable. I believe ITTVIS did the right thing
with this move. This step back to clean up an old mess was absolutely
necessary. I can definitely hear myself swearing less since eclipse came
into my life. :-)

Haje
