Subject: how to increase dpi of an IPLOT?

Hi IDL gurus,

I finally got to the point that my nice IPLOT-created graphs were accepted for publication. Although I thought I can sleep peacefully now, the editor just mailed me with the request that the graphs should have at least 500 dpi resolution.

I was hoping for a simple keyword to quickly fix this fuss, but it appeared not to be as easy as I initially thought. I fail to see how to change dpi (or ppi) resolution. On whatever format I try (e.g. .eps), when opening the graph in Illustrator, the ppi resolution remains 72 ppi. Can somebody help me out? It would be *\*very\** much appreciated.

A novice in printing resolutions,  
Jochem
