Subject: LUNs and plot

We are running IDL version 4.0.1 on a Dec Alpha (OSF) machine and have experienced the following problem:

After running a program about 20 to 30 times we get the following error message:

%PLOT: All available logical units are currently in use

This error message was associated with the following line:

```
plot,x,y,color=!p.background
```

Has anyone else had a similar problem? Has anyone had difficulties with IDL not freeing up LUNs even when told to do so?

Thanks,

Mitzi Adams
