Subject: Time Arithmetic
Posted by Ryan. on Fri, 14 Dec 2007 19:49:27 GMT

Hi All,

I have a collection of event-duration-times (in minutes and seconds)
that I would like to add up to know how much total time is used. Does
anyone have or know of any routines that can do this? I have a copy
of Kenneth Bowman's Date/Time library but on initial inspection I
don't think it can do what I want it to do.

Thanks,
Ryan.
