> Hi, I'm running an idl programm in Envi batch mode. I used the "envi,/restore_base_save_files" in the beginning of the programm, however, I sometimes got compiling errors about the Envi functions used in the programm. I did use [] instead of () for my arrays, why I'm getting this compiling error? Do I have to use Forward_function for all of the Envi functions?

Just in case... do you have this at the top of your function:

```
compile_opt idl2
envi, /restore_base_save_files
envi_batch_init
```

Using [] for arrays IS the good thing to do... you might have problem if you use (), not the contrary!
