---

Dear netters,

I am a PV-WAVE user. Recently, the system administrator installed the PV-WAVE version 5.00b and removed the older version 4.20c. Problem arise when I use the command `< SET_PLOT,'HP' >`. The Visual Numerics Inc. do not support the HP-GL Plotter Driver now. What can I do in order to print some graphs using HP-GL Plotter?

By the way, I want to import some graphics file in Microsoft Words document. I try to generate the graphics file in encapsulated PostScript format by issuing the command:

```
WAVE> set_plot,'ps',/encapsulated
```

and then import the graphics file into Words 6.0 document. However,I just obtain a frame and some texts. Why is this so? How can I tackle this problem?

Direct e-mail would be greatly appreciated !

Thank you !
