Ah, ha! While poking around the ITTVIS web page looking
for the CVS plug-in, I found a list of languages supported
by the IDL Workbench. I've put the two-letter
abbreviation you are suppose to use to access these
languages next to the ones I have been able to figure
out so far.

 Chinese (Traditional & Simplified)
 Dutch
 English (en)
 French (fr)
 German
 Italian (it)
 Japanese (ja)
 Korean
 Portuguese
 Russian
 Spanish (es)

Anyone what to help fill out the rest of the language?

Cheers,

David
