Subject: middle click?
Posted by c.bonnett on Thu, 03 Jan 2008 14:03:56 GMT

Anybody had any luck with getting middle click to work in X11 (IDL)
i'm actaully working with a three button mouse, so it's not the
emulation that is the problem...

I applied the following command already : defaults write com.apple.x11
wm_click_through -bool true
from the webpage: http://macsingularity.org/2007/03/23/idl-and-mouse-cursor-pr oblems-on-os-x/

that got it to register left and right click... but no middle-click...

any ideas?
