Subject: HP Paintjet XL (with HPGL2 cartridge) printer Posted by buteau on Mon, 28 Sep 1992 14:56:09 GMT

I'm trying to use an HP Paintjet XL printer with HPGL2 cartridge to print PV-Wave graphics. I can get SURFACE or PLOT graphics, but the only colors I obtain are the eight basic colors (red,green,blue,black,whitecyan,yellow,magenta), althought this HP printer is able to print 330 colors.

So How could I get more colors ???

Thanks in advance
