Thanks to all of you who replied so far :-)

Though I found the FAQ, the PV-Wave coverage there is not extensive. Probably I missed it, but can one use IDL programmes without any modification in PV-Wave ? Is it version dependable? Some links in the FAQ didn't work for me, either. I know that there is a Linux version of PV-Wave somewhere, is it on the market yet? Is anybody aware of FFT routines libraries and/or libraries for spectrum analysis?

Sorry for being a bother :-)) and thanks in advance

Cheers
