Hello All,

I am trying to use a widget slider but i can't find out how to make it work with real numbers rather than integer; it doesn't seem to be in the IDL manual or reference guide. Is it possible ? Does anyone know how to do it ?

I have tried simple things like ,

```
sliderid = widget_slider(base, max = 2.0)
                ^^^^
```

cheers,

David
