Subject: stop behavior
Posted by Bringfried Stecklum on Wed, 23 Jan 2008 11:15:20 GMT

Hello,

I encountered a strange behaviour (IDL6.4 x86_64) when debugging a main
program. There are several stop commands here and there. After the first
stop, I cannot continue with .cont, the code execution stays at the same
line. After issuing a command, e.g. print, .cont jumps to the first line
of main. Am I missing something?

regards,

 B. Stecklum
