Subject: Re: Releasing memory in IDL
Posted by Jaime on Wed, 23 Jan 2008 22:05:43 GMT

Hi Dave,

The code can be downloaded from here: http://www.ifa.hawaii.edu/~jpw/clfind/clfind.tar
and the description of the code is in here:
http://www.ifa.hawaii.edu/~jpw/page16/page4/page4.html

It is a program to define structures (clumps) in a data cube (radio
astronomy).

Best,
Jaime
