
Subject: printing edges in Normal coordinates

Hi All,

Does anyone know what the margin of the printing area is in normal coordinates? I have a feeling it might depend on the printer, but I don't know. I am printing some text using the XYOUTS procedure and it isn't showing all of it. I would like to know how much I need to adjust it to display properly.

BTW I'm using the PS device.

Thanks.
Ryan.
