Hi

Have corrected filename so program now reads:

=====

```
PRO COLOR_PLOT
```

```
x=[0,1,2,3,4]  
y=[0,2,4,6,8]
```

```
entry_device=!d.name  
keywords = PSCONFIG(Cancel=cancelled)  
IF cancelled THEN RETURN  
set_plot, 'PS'  
device, /color, filename='colorplot.ps'  
plot, x, y, color=FSC_COLOR('indian red')
```

```
device, /close  
set_plot, entry_device
```

```
END
```

=====

I'm trying to get it to run by saving the program, then using the compile button followed by the run button within the IDL Development Environment (basically the same as typing .compile...etc) but I still get an error in the syntax on the line beginning "keyword" when I compile it.

Thanks  
Chloé
