Hi

Yes I have unzipped and extracted all the contents and as far as I can tell have successfully added them to the IDL path (I used, preferences-> path and then inserted the folder named "color" so that its now in the list of the IDL File Search path).

Sadly I can't use excel as I need to analyse 1000s of data sets, but at the moment I'm just trying to grasp the basics of IDL, ie. learning to plot a simple graph before I move on to more complicated things.

Thanks
Chloé
