"When you have no choice, you must embrace the inevitable."

I think I read that in A Madman Dreams of Turing Machines,
a wonderful book, although I can't find the quote at the moment.
Sounds like something Alan Turing would say. :-)

With the exception of losing graphics windows, I would
have to say that by and large I am pretty happy with IDL 7.
Of course, I've stripped the damn thing down and configured
the hell out of it so that it looks and acts like IDL 6.4,
but, still...

The only thing I am really missing is that wonderful ability
to edit by columns. That was neat. :-)

Cheers,

David
