Research Systems has a new WWW site, which includes product and company info - plus links to several outstanding customer sites. Check it out and update your bookmarks...

<http://www.rsinc.com/>

If you have a website that promotes your work - with nice visualizations using IDL, ENVI or Research System's Visible Human CD - and would like us to consider a link to your site, please send your URL to "webmaster@rsinc.com"

Many thanks to the University of Colorado for hosting the older (now obsolete) IDL homepage.

Peter Hallett
Research Systems
